Full-Stack Software Engineer with hands-on experience designing and delivering production-ready web and mobile applications using React, Java, and cloud platforms. Strong background in building scalable, secure systems, working with relational databases, and applying clean architecture and testing practices across the development lifecycle. Experienced in workflow automation, system integration, and translating real-world business requirements into reliable software solutions. Comfortable collaborating with cross-functional stakeholders to deliver high-quality outcomes, with additional exposure to React Native and Flutter for mobile development.

Education

- Michigan State University, Bachelor of Science - Mathematics *September 2014 – June 2018*
- University of Queensland, Master of Information and Technology *July 2019 – December 2022*

Skills

- Languages: Java, Python, JavaScript (ES8), TypeScript, C++, PHP
- Front-End Development: React.js, Redux, Vue.js, Next.js, HTML5, CSS3, SASS, Bootstrap, Responsive Design
- Back-End & APIs: Node.js, RESTful APIs, .NET
- Mobile Development: React Native, Flutter
- Databases & CMS: MySQL, MongoDB, SQL, WordPress, Strapi
- Cloud & DevOps: Amazon Web Services (AWS), Google Cloud Platform (GCP), Docker, Kubernetes, Azure Pipelines, CI/CD
- Testing & Quality: Unit Testing, Integration Testing, UI Testing
- Tools & Platforms: GitHub, Bitbucket, Jira, Postman, Visual Studio Code, IntelliJ, Figma, Adobe Creative Cloud

Experience

- Full Stack Developer, Cessleigh, Sydney *March 2026 – present*
 - Architect and maintain scalable company websites and digital platforms across the organization's ecosystem utilizing modern web technologies, including React, JavaScript, and Node.js.
 - Spearhead the end-to-end development of a diverse portfolio of digital properties—including Housed, the premium Onsen platform, and the Simba suite (Education, Health, and Hearing)—expanding the company's digital footprint.
 - Engineer responsive, mobile-first interfaces and standardize cross-platform performance across multiple distinct brands to ensure a seamless, fast-loading user experience.
 - Partner with cross-functional teams to translate complex business requirements into robust technical deliverables and manage highly reliable, multi-site production environments.
- Workflow Automation Developer, Total Aircon Fittings, Sydney *January 2026– August 2026*
 - Architected and developed a custom workflow automation system with robust state-management logic—spanning from booking to invoicing—to enforce data consistency and streamline the entire job lifecycle.
 - Modernised operational processes by analysing legacy MYOB and Xero workflows, drastically reducing duplicated data entry and laying a future-proof foundation for seamless accounting API integrations.
 - Partnered with non-technical stakeholders to translate complex real-world requirements into intuitive system functionalities, successfully eliminating administrative bottlenecks and driving high user adoption.

- Software Developer, VEPRM, Sydney

February 2025 – September 2025

 - Develop and enhance website functionality using **React**, **JavaScript**, and **Node.js** to improve user experience and maintain platform efficiency.
 - Collaborate with cross-functional teams to implement new features, optimize performance, and troubleshoot existing issues.
 - Ensure high-quality code by following best practices in front-end and back-end development, improving overall system reliability.
 - Maintain and update existing platforms, integrating modern solutions to keep up with technological advancements.
- Software Developer / Test Engineer, Braiv, Sydney

September 2024 – December 2024

 - Contributed to a multi-language video hosting platform using AI-driven captioning and translation features, emphasizing secure and privacy-conscious data handling.
 - Developed and maintained full-stack web applications using **Java** for backend services and **React** for front-end interfaces, optimizing user experiences with responsive design.
 - Utilized **Python** for data processing, analytics, and AI-driven features, enhancing captioning and translation accuracy.
 - Automated infrastructure deployment on **GCP** using Docker and Terraform, supporting a reliable, cloud-agnostic deployment environment, and implemented **infrastructure testing** to validate configurations before deployment.
 - Collaborated with cross-functional Scrum teams, delivering on time and optimizing video performance with a 20% improvement in load times.
- Web/Mobile App Developer, Upward Consulting, Brisbane

October 2023 – July 2024

 - Developed and maintained custom websites and mobile applications for diverse Australian businesses, enhancing digital engagement and customer experiences.
 - Utilized **HTML**, **CSS**, **JavaScript**, and **Flutter** to create responsive and visually appealing web and mobile interfaces, ensuring seamless user experiences.
 - Built and customized **WordPress** websites, optimizing performance and functionality for client needs.
 - Redesigned Upward Consulting's website, increasing performance by 30% and implementing comprehensive **SEO** strategies for better client visibility.
 - Enhanced website responsiveness and accessibility across devices, contributing to a 25% increase in mobile user engagement.
 - Implemented security protocols and conducted regular site audits to safeguard client data

Certifications		
●	AWS Certified Cloud Practitioner, Amazon Web Service	2023
●	AWS Certified Machine Learning Engineer - Associate	2024
●	Salesforce Certified AI Associate	2024
●	Microsoft Certified: Power BI Data Analyst Associate	2024
●	IBM Data Analyst Professional Certificate	2024
●	Oracle Cloud Infrastructure 2025 Certified Foundations Associate	2025
